Hi All, I have what I hope is a simple question for those using Netcad. In particular, I want to use Netcad, to create an object, which will have some internal planes. (the dimensions are just imaginary; but will still be some 2 or 3 for a cube) I want my model to have front, back and top/bottom faces, that will be visible at the end. For example, I have a plane, with dimensions 1.8m x 1.1m x 1.0m. By using one of the 3d-rotation keys (i.e. i,j,k or x,y,z keys), I can rotate and/or rotate the plane back and forth. (to change the view angle, for example) I was wondering if there is some easy way to 'rotate-on-a-plane' rather than having to change the view angle? ##VERIFIED## Planet Modulu Netcad 5.1 Indir Planet Modulu Netcad 5.1 Indir Linked Items~ Planet Modulu Netcad 5.1 Indir.
