Paddy is a user-friendly file and folder cleaner that allows you to select files and folders, then customize their deletion options. This includes a full list of criteria, including size, modification date, place, and so forth. Paddy Features After deleting the files or folders, you can easily restore them by moving them to a different folder or even saving them. Paddy also can save lists of names. Program interface Paddy's user interface is simple and intuitive. There's a workspace with the currently selected files and folders. You can click the Tools button to create or open the garbage bin, the file list, and the folder list. Garbage bin The garbage bin icon is for deleting selected items, of which you can choose from the current items list or add them manually. The bin works similarly to the Trash folder or Recycling bin. List display The list display icon lets you browse through the file lists, such as the file names or sizes, so you can customize settings with ease. It supports HTML, allowing you to highlight text, use a bold font, or apply different colors for the selected or highlighted items. Search list display With the search list display, you can display all files, regardless of size and modification date. If you search for a specific name, the name will be highlighted in red. Folder list You can navigate through the folders by clicking the folder list icon, which allows you to add new folders, rename existing ones, or delete them. It also shows you the total file and folder size in its upper right corner. Custom lists Paddy supports customizable lists, including excluding certain criteria from being deleted. For example, you can define a list of all Microsoft Office document files, which can then be displayed in a specific list, making it easier to determine which items should be deleted. Filtering The filtering pane can be opened by clicking the Advanced button. Once there, you can specify the items to include or exclude, for example by selecting the criteria and size. Evaluation and conclusion Paddy is a simple to use program that does not demand any complex training. The interface is fairly intuitive, offering a full list of criteria as well as several different ways to filter and delete files. The program quickly responds and is easy to perform even on Windows 10. Who knows Paddy Free is a free version of the software that is not limited to a time frame and provides you with a set of features and
