The programs that do the patching are located in 'crack' folder, so it's not necessary to go into the 'original game' folder. For example: On Windows XP: 1) Go to the folder where you installed your game (C:\Program Files\Age of Empires 2) 2) Open the Age of Empires 2-Bin folder 3) Right click the executable, and select 'Properties' 4) At the bottom of the properties window, go to the 'Compatibility' tab 5) Select 'Windows XP (Service Pack 3)' 6) Click the 'Apply' button Now you don't have to search for your disc. On Windows Vista/7/8: Go to the game folder. Open 'Age of Empires 2.exe' and right click the executable, and select 'Properties' On the 'Compatibility' tab, select 'Windows XP (Service Pack 2)' or 'Windows XP (Service Pack 3)' If the file is already patched, you may need to 'skip all' and 'continue' the patch (right click the executable, and choose 'Patch' or 'Apply') If the patch fails, select 'Advanced' and change the 'Compatibility' option to: Windows Vista (Service Pack 2) or 7 Windows Vista (Service Pack 3) or 7 Note: Windows 7 would be preferable Finally, after the patch is complete, your game won't have a CD.
