ActiveData For Excel Crack+ With Serial Key Free Download

ActiveData For Excel is a professional addin designed to enhance Excel's functionality with data analysis features. ActiveData For Excel allows users to summarize, merge, match, query, etc their worksheets. ActiveData For Excel is ables to process up to one million rows at amazing speed. Key Features: * Summary and Analysis of Data - The users can summarize the data from a variety of points, i.e. per customer, per date, per supplier, by value, etc. The cells of each summary view can be formatted in up to five different styles to customize their appearance and content. The summary data can be applied to the same, or to different, sheets, or a range of cells. The summary can be saved to an Excel workbook for future reference. The summary data can be displayed in a tree-like structure, by category, or in a matrix. * Merge and Match - ActiveData For Excel allows users to merge and match with other sheets. The spreadsheet can be analyzed and the source data merged or matched to any other sheet with no time lag for complicated data processing tasks. Various methods for matching the spreadsheet data to the other sheets in the workbook are available. In addition, the user can easily identify which portion of the merged or matched data is duplicated or different from the source data. Duplicate data can be rejected before the merge or match. * Excel-Oriented - ActiveData For Excel runs effectively on Windows 2000, XP, Vista, Vista Sp1, Vista Sp2, Windows Server 2003 and Windows Server 2008. ActiveData For Excel gives excellent performance on the Excel spreadsheet. It reads the data from excel files and optionally from web services. * Executable Version - ActiveData For Excel is an EXE-file that installs into the computer without registry changes. ActiveData For Excel reads the data from excel files and optionally from web services. * Clean Version - ActiveData For Excel reads the data from the stored workbooks without using Excel AutoCorrect, AutoFill, AutoFit, etc. The program helps to reduce the file size and thus improves the performance of the process. ActiveData For Excel can still export the summary data to Excel. * Live Update Version - ActiveData For Excel automatically downloads the latest version for data analysis updates from the Internet and automatically installs the updates. * Full Network Performance - ActiveData For Excel is multi-threaded to allow processing of multiple files at the same time. The program has been tested for performance on a single aa67ecbc25

ActiveData For Excel Crack+ (Updated 2022)

What's New In ActiveData For Excel?

A great tool for Excel users to analyze large amounts of data. Analyse aggregated data from different tables, convert a CSV file into a SQL query table, analyse the data output from a database query (use a SQL query table to initiate a data base query) or import data from a Web Query. Visualize data with date ranges, ranges of interest, or custom time intervals. This Product can bring new life to Excel and make your work easier. It could help you do the analysis you need faster, and achieve more. Do you remember the times when you had to write complex query (using SQL) in Excel to find the information you need? Do you remember the times when you had to copy data from one table to another, and then copy it again to the desired location? Do you remember the times when you had to open a query (or any other data) in another program, and then copy and paste the data into Excel? Are you tired of repeating this complex task, again and again? Do you remember the times when you had to read and write the data files generated by a web query separately? Do you remember the times when you had to read the data in a table, and then copy data to a different table? Do you remember the times when you had to use a third-party program to read and write the data files? Do you remember the times when you had to read and write the data every time you open the file? Are you tired of repeating the above tedious tasks, again and again? Do you remember the times when you had to use Excel's macro language to analyze the data? Do you remember the times when you had to use Excel's built-in formulas to analyze the data? Do you remember the times when you had to use Excel's built-in functions to analyze the data? Are you tired of repeating the above tasks, again and again? Do you remember the times when you had to use a third-party program to analyze the data? Do you remember the times when you had to use Excel's built-in functions to analyze the data? Are you tired of repeating the above tasks, again and again? Are you tired of reading and writing data to different files? Do you remember the times when you had to write a file of data for a client, only to find out a day later that they changed the format of their file? Are you tired of repeating the above tedious tasks,
