syntax to count all records in a database in Java I have been trying to get this to work but keep getting syntax errors or null values. Is this the correct way of doing it? String countQuery = "select \* from members where level ='1'"; query = db.createStatement(countQuery); ResultSet result = query.executeQuery(); if (result.next()) { count++; temp = result.getInt(1); total++;  
//ResultSet.CONCUR\_UPDATES prints number of updates in database to console  
//ResultSet.CONCUR\_UPDATES = ResultSet.CONCUR\_READ\_ONLY |
