Move from Elle Dangerous to Oculus Rift by Google CardboardInvolvement of tyrosine kinase activity in the biological response to tissue factor expressed by human breast cancer cells. We sought to elucidate mechanisms underlying the transmembrane signal transduction induced by human tissue factor (TF) in human breast cancer cells. Both K-562, a human chronic myelogenous leukemia cell line, and MCF-7, a human epithelial breast tumor cell line, were responsive to stimulation with recombinant human soluble TF. Both cell lines expressed TF mRNA and TF protein on their surfaces, and both cells internalized and processed exogenous TF. Pretreatment with bisindolylmaleimide (BIM), a tyrosine kinase inhibitor, resulted in decreased chemotactic and DNA synthesis responses to TF. Tyrosine phosphorylation of cellular proteins by TF was detected in both K-562 and MCF-7 cells, and TF transphosphorylated v-src, a nonreceptor tyrosine kinase, and phosphorylated a 60-kDa cellular protein. Cell-attached cross-linking of TF to monoclonal antibody activated an endogenous tyrosine kinase activity, which was inhibited by preincubation with BIM. We conclude that tyrosine kinase activity plays an essential role in the transmembrane signal transduction of TF expressed by cancer cells.The most frequent type of body piercing involves piercing the ear lobes in the shape of a cross. Edit: This used to be a mod for the game "The Elder Scrolls V: Skyrim. The purpose of this is to make the main quest a little more enjoyable. To do so, a few dozen (or maybe several hundred) lines of dialogue have been inserted between quest chapters. There is no other alteration to the main quest. Use the "speak to" option to talk to the NPC. Make sure to click on the NPC to speak to it and check the verbosity box under the speak to dialogue options. The sound from the main quest can be silenced using the console command "silence mainquest.ogg." This mod is no longer being actively maintained. It is a very large area, spanning the entire north to the south, and east to the west. It was the first area that I finished, and it was a nightmare. Skeleton Legion, an undead army that essentially makes you fight against all of the assassins in the game. Q: iOS6 OpenGL deprecated situation regarding deprecation When running OpenGL ES 2.0 sample code on my iPad 3 (iOS 6) I get a lot of deprecation warnings and the POD from gl.h is no longer fully implemented. Is this a known issue? I wouldn't believe it is, as my company's iPad 3's at the moment are still running iOS 5. A: Apple indicates that they've decided to remove support for OpenGL ES 2.0 from the iPad 3rd generation (and prior), which can be found on the "iOS Human Interface Guidelines" website, specifically in the "Retina Displays" section: Note: If you rely on the OpenGL ES 2.0 API, you should avoid this new iPad and use OpenGL ES 3.0 for all of your apps. In general, it's not a good idea to generate warnings (or even errors) based on features that may be removed in the future. Q: Ethernet Switch theory question In the comments of this question Enterdway wrote: Not all Ethernet switches are consumer ones though, there are enterprise ones. They're not exactly the same though. I've been working with an old plantronics switch that I need to reprogram via serial. An older system uses a 3.5mm
