THE RAGE OF ASTRAL FIRE The world’s legendary story begins with the birth of a young adventurer named Noriel, who is born in the Throne of Elden. A child of privilege who leads a happy life, he falls in love with a human girl. But a tragic accident endangers Noriel’s life and that of his family members. As a consequence, the princess and her beloved twin brother go missing. The strength of the element of Fire was born in this strange incident, a most frightening and terrifying evil that threatens Noriel’s village to befall. The young protagonist gets in contact with a girl living near his village. She has had the same unfortunate fate as the members of his family, and she is also a strong bearer of the element of Fire. Now, the destiny of young Noriel and the girl will be intertwined with all that happened in a long past… • STORMBLIND A mysterious girl appears on the horizon in an emotional moment. She bears a pair of large violet eyes, which closely resemble the gem of the Elladan. As her name suggests, she is blind… • Yaiba A beautiful woman in wolf’s fur appears before Noriel. She calls herself a Yaiba, an anthropomorphic animal who lived in the world before men. Apparently her race was wiped out during the great war. Why has the Yaiba appeared now? • CELESTIAL CAVE The protagonist ends up in a cave full of mysterious treasures. It is the safest place to hide from the terrible dangers the Lands Between have to offer. • THE HIDDEN GRAND CHALLENGES In the midst of the exciting action, YOU WILL BE INVITED TO VICTORY CHALLENGES THAT POSSESS UNIQUE STRENGTH! • POST-MORTEM The art of storytelling is reflected in the game’s post-mortem elements. • PREMIUM FEATURES Premium 1. More Adventure from the point of view of the setting that incorporates fantasy and world of magic! 2. The game is compatible with the Oculus Rift! 3. New themes featuring the world of anime are introduced in the game!! 4. An exclusive prequel story that tells the origin of your friend, the Yaiba!

But have these new laws cost us more in the long-run? I'm sure the Kings Royalty feel differently. The introduction of the Energy Performance of Buildings Regulations, formerly known as the Control of Noise at Building Works Regulations, come into force on 6th July this year. For businesses not within the compliance deadline, this introduces a fine of up to £2,500, a reduction in business rates, and the ability to add an occupant's specific noise and nuisance level to buildings to be assessed. There's an opening of a case to challenge an on-site assessment of the noise made by a noise officer who has charged the penalty, or received a penalty notice. Unfortunately, this is a case which can be costly and long drawn out. Unfortunately, the cost of adhering to these regulations is not just for the building owner. Additionally, building owners are often concerned that these regulations will be used to increase energy bills. There is one major positive about the new regulations, which is that they are highly likely to be the first step towards the eventual abolition of the LVT, a tax on fuel that collects twice the amount from those who use the least efficient modes of energy. The amount collected per unit of fuel, or the LVT, varies from method to method, but the rate of tax for electricity is generally 10 times the rate of tax per unit of coal, and approximately 50 times the rate for gas. It's estimated that these new regulations will amount to an average of 5% reduction in energy bills per year. Ministers hope that these new regulations will improve the quality of the air in the UK, reduce the amount of pollution created by more fuel efficient
