### **What's new:**

- **Introducing "HyperMotion Technology", a data-driven revolution to FIFA that will transform the way fans play. It combines human motion data from live-action matches with a variety of gameplay data - such as player traits, skill ratings, ball touches, contact data, ball contact, tackling, aerial duels, and more - to create unique player models. All of these are supported by further data from FIFA Head to track these in-game assets over time - from upgrade rankings for all-time attributes to gradual evolution based on training activities and gameplay. Multiple enhancements to the Player Traits system, Player Slots and Skill Ratings allow for a**

  - **Powered by the creators of the FIFA series, FIFA 22 features highly-detailed players with unprecedented control. The simulation engine has been optimized to handle these more complex dynamics and it delivers an unprecedented level of realism in and out of the box. Players and training activities together play a key role in player aging, technique progression, growth, injury recovery, and more.**
  - **Physically-based MatchDay gameplay means that - with greater realism - players cover different distances at different speeds, and react realistically to environmental conditions or contact situations. In addition to responsive controls, players are more powerful and use higher volume sounds, animation and visual effects to enhance the experience.**
  - **FIFA 22 introduces all-new Cascading Gameplay Moments (CGM). Based on real-life player traits, behaviors, and match performance, CGM will provide greater context, game atmosphere and challenge on either side of the ball. In Career Mode, CGM will impact gameplay for entire seasons, while during live gameplay, CGM can be triggered at any point as part of a goal sequence.**
  - **Expanded integration of third-party content. FIFA 20 made it possible for players to share their creations within the game in the form of challenges, boots, jerseys, kits, training kits and more. As developers were generating and uploading more content, user-created content exploded in popularity. FIFA 22 enhances the integration of user content by allowing players to design uniforms for all 23 official kits, as well as boot, ball and goal models. There are more meaningful ways for users to participate in the creation of both their in-game clubs and the players within the game.**

**Brynäs HK** Brynäs Hockeys HK is a Swedish band playing rock and heavy metal. They became very popular in the former Yugoslavia, Albania and Sweden. History Brynäs played their first gig in 1977 at the student olympiad in Riga, Latvia. Their first album, Brynäs had the line up of Benny Johansson, Roland Bergholm, Christer Tornberg, Mikael Jönsson and Stefan Rydevik. The cover was the only drawing done by Benny - "Stefan" and "Roland" were the names of the band's roadies. According to Benny, he designed the cover because the band members didn't have any money to buy a drawing tube. In 1982, the record company Hellens Bellon changed the line-up to Ray Bergholm, Benny Johansson, Johnny Björlin and Torgny «Sten» Anströmer with the addition of Bob Kronberger on bass and the Swedish guitarist and future Full Blooded Ceremony member Janne Lundgren. In 1983, Brynäs visited Afghanistan, and

recorded their second album *Brynäs en Konstig Förrän*. In 1984, the band moved to the United States and opened for Ted Nugent at the San Francisco Blues Festival and were filmed by the BBC. With Janne Lundgren's departure they changed their line up to Benny Johansson, Torgny «Sten» Anströmer, Ingemar Matschant, Jack Wagner on bass and new vocalist Jonas Hammar who replaced Björlin. In 1985, Brynäs published a book, which was called *Brynäs*
