**Jacket Phantom Phantom Abyss Jacket**  
"Also, their phantom seems to be more in the long run, as well as a better gun, one that is lightweight and packed with all-around performances. There are hardly any collision between the gun and hands. The mesh feel is similar to a Senso Mesh." One That Stands Out from the Start "I was able to enjoy this one on quite a few video games. Some of my favorites are FIFA 16, NBA Live 19, and Call of Duty: WWII. The weight of the Phantom Abyss is quite light, and it does its job well in enhancing my game. Previously there was a lot of lag that made this gun look like a hot potato, but the phantom allows you to handle the gun without any trouble. I also enjoy most of the covering abilities for the Phantom Abyss. The Abyss makes it easier for me to block or stop incoming close range attacks or shots. The phantom has dual firing mechanisms that allow you to fire two shots at once. Another good feature for the phantom Abyss is that the spring can be upgraded. There is a possibility that you

**can get new spring models under the phantom Abyss website and using unique codes. Other than these features, I also liked the light weight." A Little Fall in Quality "I did, I did, the best I could! It is also a responsive gun when it comes to map details. For example, if you are using a billiard game, the movement for the phantom works amazing. If you are on a shooting game, you will notice that the difficulty increases during movement." No Blammo "The lack of blammo on the phantom is really awesome, and it makes the game much safer and enjoyable. I am happy to see that the lag has almost gone away. I understand that this can't be helping to balance the phantom by hardwiring itself, but for now, I am still enjoying the Phantom." The Best of The Line "At first, I was skeptical about the price of the phantom Abyss, which is 90 dollars, but after testing the phantom myself, I would say that it is worth it. When I first got the option, I thought "wait, 90 dollars for this?" but after using it, I was only happier about it. They sell a new phantom every month, and there is always**

The two misshapen gods have finally decided to bring forth a new world to bless with their presence. Oh, but in order to do this they need to fit into it. That is where you come in. In order to create this new world, the two gods have come down to the mortal realm. The only being qualified to help them is you. Video Pros Fun and original feel Good music/visuals Quick and easy to play Cons Short The player is made to feel slightly... limited Some minor control problems (like having an A/S/D/W/etc stick in place of the fire button on the fly) Make the right thing happen 1. If you don't understand any of the terms listed below, skip to the next game. 2. The game is all about making the right/best thing happen. You select the majority (anymore than 50%) of each panel and let the computer take it from there. 3. There is no point in making a bad thing happen. 4. Use the left stick to move the tornado as you aim with the right stick to make the most powerful thing happen. 5. Your goal is to stay afloat as long as you can. 6. Don't stop playing. ;) I know it sounds a bit bland, but so far so good. Tornado!
