Spoiler Alert is a video game that tests your platforming skills... in reverse. It's a comedy platformer that you play backwards. When you pick this game up, it has already been beaten. The big bad boss is defeated, the coins are collected and the princess has been rescued. Why, oh why? Unraveling this mystery takes you through the entire game, from the last level to the first. You must uncollect the coins, revive the enemies and avoid nasty time paradoxes. In other words, you must uncomplete the game by playing it backwards. Everything in this game is so familiar, yet so different and new. You have played it a thousand times before, and at the same time, you have never tried anything like it. 100 Levels in 4 worlds SpeedRuner Mode Start playing at the end and make your way back Classic platformer gameplay mashed with simple controls Beautiful handdrawn graphics Original soundtrack by Roland La Goy Epic boss fights, upgrades and many different and unique enemiesThe Steam-exclusive Collector's Edition version includes Level editor with Steam Workshop The original soundtrack, including a new bonus track and deleted tracks The original Game Jam version of Spoiler Alert - see how it all began Exclusive hi-res desktop art and concept art Screensavers, deleted graphics, and more! ### **The direct download of this game via NetGalaxy is the preferred way to go.**

The direct download way is the best, as it is not dependent upon anyone's upload policies and allows for very easy updates. It requires only one download from a website to create a playable game, with all updates being one single download as well. It's important to remember that when you choose this method, it is directly transferring the files from our download locations. On one hand this is convenient to have the files ready to be installed when needed, but on the other hand, NetGalaxy currently struggles with large downloads and massively bandwidth intensive games. This situation will hopefully improve in the future, when the site actually starts to monitor the number of people using its download service.

### **NetGalaxy's Network Volume Install Method**

The file will also be transferred to your

## **What's new:**

**Portraiture I made a vast amount of progress in my art class last week. The short story is I broke my arm (and I mean, I can tell a friend if I want to but don't want to make a big deal about it). I'm feeling mostly 100% again (which is why I haven't posted in so long), but my arm is a bit sore. But, per usual, the art gods intervened for a purpose of hardening my pain tolerance more than anything else. My instructor is mostly an experimentalist, and one of his strongest traits is breaking our students. Ideally, for completion of the course, we have it planned that every student takes a step back and peers at my art class from the outside. While this is certainly difficult, this will also prevent most students from being "sucked" in on accident. The instructor requests that students do this so we can see students' three-dimensional views of our pieces. To that end, I'm shortening my gum line when photographing my work. The point of this photographic technique is to focus on the piece as a whole (which I've only done briefly to date) by peering into it at a given angle, which makes the camera distort the shape and form of the image. This is what will be occurring next week for me. I'll break my arm again (after writing this, I'll be in the doctor getting my cast changed), and I'll have my three dimensional photo taken. Sorry, James. From this picture, it seems I'm drawing some galaxy lines in charcoal. This week I was officially voted "2013 Best Art Student" by my instructors, for the third year running, so the real contest for this year's title was on. This also happened the week before the year was supposed to end, so we have two of the weeks of this year gone and we're already in the playoffs for Best Art Student. I guess we took our titles seriously. The rules of the show are that all of the three best art students in the show will be given a billboard. The only thing the billboard has to work with is it's surface. So what are they doing? Fabricating/manipulating a canvas and printing or tracing the image on it. So I was presented with this huge canvas with ten images printed onto it**

In the city of Oras, lives a Detective named Serena Valvra. With his indestructible heart, he has saved a civilization destroyed by dark forces. However, it is said that he is not a force of good. Is he? Or is he the one who gets to decide what is right and wrong...? Now, take on the responsibility of becoming the new detective. In the world of deceit, truth, and lies, there are clues. You must go to school, investigate, and make choices, all while fighting against monsters and traps! Do you like detective games? This is the game that was made by the same people who made "That's my jam" and "Secret of Mana"! It's a game that combines elements of a visual novel and adventure game. In "Oras Stories", you can choose the path you want to take and the game will progress as you play it. It's a perfect game for those who hate micromanagement. Disclaimer: I do not own anything other than the character. I made the characters that I put into the game based on my research and imagination. This is a free game and it is something I make for myself. As for the story, it is a very dark story. I recommend that you play it with headphones. If you like it, please leave a good review.

The Year of Decay - Year of Decay 2 Welcome to the Year of Decay. The world is a funhouse - a place where dreams and nightmares are not only allowed, but encouraged. And so it's no surprise that things have gone mad. People have begun to split and mutate. Small farm animals have turned into giant, feathered monsters with fangs the size of a man's forearm, and a feral rage that makes the world tremble. These monsters grow into savage, man-eating beasts with powers stronger than you can imagine. When you and your friends wake to find your hometown overrun by these creatures, you have a choice to make... either walk the path of the coward, or become someone who can look these monsters in the eye and tell them to STAY DOWN. The Walk A fighting game where the controls, moves, and fighting styles have been heavily influenced by super-hero movies. Utilizing a unique combination of elements from traditional beat-em-ups and 2D fighting games, together with the unique features of our character creation system, you
