Unraveling Boron-Carbon Interactions by Magnetic Resonance Spectroscopy. [reaction: see text] This work presents the detailed structure of boron atom in aromatic compounds by magnetic resonance spectroscopy in conjunction with computational studies. In particular, the aromatic boron site in substituted naphthalene and anthracene is studied by multidimensional nuclear magnetic resonance spectroscopy and computational methods. From the experimental results, it is observed that the aromatic boron sites can be enhanced or quenched through the electron-withdrawing groups; the structure and position of the boron atom vary from compounds to compounds. Quantum chemical calculations were performed on isolated boron, hydrogenated boron, and boron-bonded carbon radical in an aromatic framework. The calculations reveal that the boron atom in aromatic boron compounds is not always bound to two carbon atoms; there are three stable boron sites, including two different boron-coupled carbon sites.

The early X-Com and Dungeon Keeper tropes are wrapped up in an intuitive dungeon crawler, Karnage Chronicles, from red lily studio. You control a team of heroes as they explore a randomly generated landscape filled with monsters and treasures. Karnage Chronicles is a bit of an all-in-one experience, because your hero can get spelunked underground as well as scale ladders and take out enemies on the surface. That means there's an emphasis on managing inventory, upgrades, and even character direction as you venture deeper into the dungeon. While Karnage Chronicles shares this multi-tiered aspect with many of its competitors, it's managed to fit them into an incredibly refined and well-tuned package. But before I delve deeper into the mechanics, I should probably go over the game's more obvious features. For starters, Karnage Chronicles is built on Unreal Engine 4, which lets you create dungeons filled with dragons and mysterious creatures with ease. The mechanics of the game are pretty simple on the surface, but there's plenty of depth to uncover. You can level up heroes, add unique items to each of them, increase the strength of their weapons, and even learn new attacks, like the ability to debuff enemies. In fact, the two main ways you can interact with the environment are through the Items and Creatures mechanic. You can equip items that can give you bonuses, and you can interact with different creatures to attack them. As you defeat enemies in combat, their bodies are dissolved into piles of crystals that grant you loot. Karnage Chronicles has a rich combat system that will bring a smile to the face of seasoned CRPG veterans. Every time you equip an item, you have access to a quick-select menu that shows you a preview of what each piece does. You can also add in special abilities and abilities that transform into powerful attacks by pressing a certain button. As for creatures, there's a variety of enemies in the game, including red dragons, werewolves, berserker giants, and trolls. Depending on what you equip, a creature will perform a certain ability with varying amounts of strength. You can still knock on an enemy's door to check if they're in or not, but the game also brings out a little bit of strategy

to combat, as creatures can be hidden in bushes, giving you a clue about where to strike. The more you level up your characters, the more they can do in combat. By that point, they can even destroy doors and open

. That is the message echoed around the country to a nation strained with tiredness, trembling hands and tight fists. Sitting on a sofa in the middle of the TV studio at the iSportground, it seems more like they were more interested in football than running. Nine guys sat on a sofa, probably still high on the adrenalin of their finish of last year's championship, while trying their best not to miss a minute of two tense and extremely bloody battles that live streamed across the globe. The evening was closing in and, after less than an hour of waiting for the second match, Esperance had beaten Cannington 0-4, confirming its position as South Australia's second team. The first battle, where the home side awaited the fight between the two Cannington-Esperance combinations, began at 10pm at the Leeming Oval. Chieffo was aggressive in the opening minutes of the game, but was trapped by a keeper-defence, stuck in a corner, unable to score. Minutes later, Uden joined the attack and he also 26 May 2016 WESTON w.G. FREE. Golf was not the priority. Everyone was running. courted, but the ball was just out of reach. Slowly, Minerva found a rhythm and during the first ten minutes really threatened to score a hat-trick. But Aoki was back at her side when the clock ticked over. Cannington pressed hard in the last ten minutes of the first period of play and pressed on a card that only bothered Uden and Miura. The return was fierce, but an isolated amateur play went against Minerva's wish. It seemed that some unfamiliar faces went to Weston's side during the half time break. The visitors needed a crunch to close the gap to five points, but successive goals kept the home side's foot on the pedal. In the final ten minutes, Uden produced an intense battle to lead for Cannington, yet Minerva remained on guard to help finish the job. The deciding match was played at ESPORT, based on the shores of Recherché. Each side started very aggressive in the first three minutes of play. Esperance,
