While we all have some type of perception, not everyone interprets these perceptions in the same way. For those people who are able to work out the significance of what they see, it is easier for them to understand others. There are times when someone says something or does something and we don't really know how to respond. If we don't know what to say to that person, we usually end up just saying nothing. Having a keen sense of perception and being able to find your own way to interpret what is going on around you can lead to problems. Those who have a keen sense of perception often find it easier to notice what others are not noticing, and this can be used against them. An observer of something can often see what others cannot see and when this information is turned against you, it can be very hard to defend yourself. Even if you think you can see something with your own eyes, you may still be wrong. We have all heard about the many doctors who can see illnesses that are not present. However, if there is something you do not believe is real, the truth can often catch up with you. If you try to cover up something or deny what you are seeing, your perception of the truth will remain that way. It is important to accept that you do not know everything. If you think you can see something that is not there, you are almost certainly wrong. If you do not admit your mistake, you will be trapped in that perception until you can accept your mistakes. This can cause problems later in life. It is important that we believe in the things we see. If we spend our whole life believing in things that are not real, we are just wasting time.
