Free PC Log Off / Sleep / Shutdown Tool. Wise Auto Shutdown enables you to set the PC to shut down, reboot, log off or sleep. Wise Auto Shutdown is an easy-to-use program that lets you schedule your PC to shut down, reboot, log off or sleep at a time and date that suits you best. This program runs quietly in the background and has no annoying pop-ups or dialog boxes. When you leave the work environment, you can easily Shut Down, Log Off or Sleep your PC as desired. The schedule menu has three built in user profiles: Daily, Weekly and Custom. If you need to run this program as an Administrator, right click on the applet and select "Run as Administrator". You can register for a free software update of your Windows computer. Download the Registration and Service Release of your choice. We are continuously improving our service. Please download the latest registry fix for your computer. * The Free PC Log Off App - For Intel PC's * Shutdown - For Android & Windows Mobile * Sleep - For Android & Windows Mobile * Troubleshoot Windows 10 Problems * Registry Code Manager - For Intel PC's Troubleshoot Windows 10 Problems * No Windows Features are available or they are not working. There is some problem with Windows that you cannot solve alone. This tool is made for you. Windows 10 Registry Code Manager: This program will locate and fix Windows 10 problems. You may have several problems. Windows problems are very common nowadays. The Registry codes of your Windows are damaged or missing. If the codes are lost or corrupted, there

is no way to fix the problem. Download the Registry Code Manager and fix your problems. Windows 10 Sleep Applet: This application will detect your Sleep mode on any Windows operating system, including Windows 7, Windows 8.1, Windows 10, etc. In your Sleep mode, your PC is switched to a "black screen" with a Wake From Sleep button to wake it up. You can schedule any time you want to turn off your PC, to log off or to reboot. Windows 10 Restart Applet: This applet will restart your PC. If your PC has a problem that stops the PC from starting (Windows startup), or if it won't turn on or boot up. In this case, the Startup Repair will not help you. We suggest that you try to restart 6d1f23a050
